

# Body Finish Paint

Body Finish Paint is a very high-quality and fast drying 1-component acrylic lacquer, specially developed to spray new or repaired sheet metal as well as parts of machines giving them an OEM finish.

## Part N°:

85987 - Body Finish Paint - 500ml Grey  
 85988 - Body Finish Paint - 500ml Green  
 85989 - Body Finish Paint - 500ml Beige

## Stock Code

BF7042  
 BF7033  
 BF7034

## Features & Benefits

Body Finish Paint owes its high value to the fact that it puts an end to the long drying and evaporation times of water-based lacquers. It saves the modern Bodyshop time and money by being immediately available without mixing and ready in 20 minutes without baking.

Body Finish Paint is compatible with most paint systems, both water-based and solvent based. The product is ready-to-use, thus putting an end to mixing times as well as disposal of lacquer surplus which is considered as chemical waste. Moreover, no spray-gun has to be cleaned when using Body Finish.

## Properties

- Ready to use, no mixing required
- Professional spray pattern (2 flat spray nozzles for small and large areas)
- Excellent covering properties.
- Dust dry after 10 minutes.
- Fast curing and impact-resistant.
- Wet-on-wet paintable with almost any modern paint system after 20 minutes.
- Anti-corrosion protection and good adhesion to matted ferrous and non ferrous surfaces.
- No disposal of lacquer surplus (chemical waste)
- No cleaning operation of a spray gun is needed

## Applications

Body Finish Paint has been specially developed for the automotive, truck and agriculture sector where it is the ideal solution for finishing repaired or (partly) replaced sheet metal such as inner-skin panels, back panels, boot floors, interior of front and rear panels, but also A-pillars, etc.

Besides, Body Finish Paint is also perfectly suited for being used in industrial applications, for example as machine paint or temporary anti corrosive repair lacquer.

## Instructions

- Make sure the surface is dry, clean, dust- and grease free.
- Matt the surface and clean with KENT Acrysol. Treat any plastic surface with KENT Adhesion Promoter.
- Shake the can thoroughly during 2 minutes before use.
- Spray 2 even layers without waiting time between them, at a distance of 10-15cm.
- Various colors can be applied wet on wet.
- After use, revert the can and spray to clean the nozzle.
