

Soft Interface Pads

Interface pads to fit between a backing plate and any multi hole machine sanding discs. The pads allow work with fine and micro-fine grits to leave less scratch marks and to work on curved and irregular surfaces.

Soft Interface Pads

5mm thick	150mm dia	A1351
10mm thick	150mm dia	A1352
5mm thick	77mm dia	A1353
10mm thick	77mm dia	A1354

Features

- 5mm thickness
- 10mm thickness
- High Quality Velcro
- 15 hole style
- Thick fabric construction

Benefits

- Leaves less marks with 320 grits and finer grits
- Ideal for curved and irregular surfaces
- Keeps the sanding disc perfectly in position
- Suits most commonly used extraction systems
- long lasting grip to the Back-Up Pad

Applications

The 5mm interface moderates the abrasive action and allows a smoother refinish, with less marks, on sanded fillers or coatings. The construction allows equal performance at up to half the price of competitive Soft Discs. The 10mm interface allows the sanding disc to follow the line of curved and irregular surfaces, rather than cutting into a change in shape. The pad allows machine sanding to be used, where previously hand sanding would have been employed. This gives a better finish in less time.

Instructions

1. Select the required interface pad to suit the job.
2. Apply to the Sander backing pad, ensuring it is applied centrally, and with the dust extraction holes aligned with those on the backing pad.
3. Apply the Abrasive Disc to the pad, ensuring alignment of extraction holes and start the machine.
4. When the sanding disc has reached the end of its life, remove and replace with a new disc

Technical Information

Part number:	A1351 - 5mm Pad 150mm A1352 - 10mm Pad 150mm A1353 - 5mm Pad 77mm A1354 - 10mm Pad 77mm	Replacing:	A1351=A1241 A1352=A1242
Description:	Soft Interface Pad	Customs Tariff code:	A094K
Shelf life:	24 months from manufacturing	SDS:	No
Selling Unit:	Each		
Hazard Info:	N/A		

SDS available on www.kenteurope.com
