

DS Sponges

DS Sponges have been developed for manual sanding and matting of edges and contours of panels, not normally possible by machine sanding. Easy to use on profiled surfaces without risk of peeling edges, they create an excellent substrate refinish.

Features & Benefits

- Lasts 3x longer than conventional abrasive sponges – saves money and reduces wastage
- 3 versions available - choice for each fine sanding job
- Will not clog or gum on 2 sanding sides - offers the maximum performance to the user
- Does not mark - ensures good finish for next working step
- Flexible sponge pad – follows the substrate irregularities and body contours
- Versatile - can be used wet or dry, best results obtained when used dry

Application

Double Sided sponges composed of Aluminium Oxide-Silicon Carbide on both sides with a highly flexible sponge backing. They are excellent for manual sanding as the thick foam structure absorbs the hand pressure to prevent marks and deep scratches left by plain abrasives with denser backings.

DS Sponge FINE — BROWN Aluminum Oxide-Silicon Carbide P320/500
